

The Town of Hinton's Infrastructure Services will be out in full force to keep our streets and roads safe this winter season. Town sanding and ploughing priorities are as follows:

1. Major arteries and intersections
2. School Bus routes and secondary arteries
3. School zones, downtown cores, and commercial districts

Residential streets will be cleared if they have become dangerous for both vehicles and pedestrians, or if they have become impassable.

Help us to work safely...

- Please move parked vehicles when you see snow removal equipment working on your street.
- Please do not push the snow onto the street or allow portions of snow to be left on the street when shovelling or cleaning snow from driveways or parking lots
- Please use caution when passing snow removal equipment as visibility for the operator may be obstructed by blowing snow and unusual operating situations.
- Please reduce speed and drive appropriately for the road conditions.

If you have any questions please call Infrastructure Services at 780-865-2634 for further information.
